

PLAYLAND

- Notes:**
1. This play structure design will meet the American Disabilities Act (ADA) Guidelines for Playgrounds and Facilities, unless otherwise noted. ADA is published by the Architectural and Transportation Barriers Compliance Board with the addition of general level play components of 24" diameter tubes of play and also includes one accessible marking.
 2. This site plan should be checked against the applicable code prior to the purchase or installation of equipment.
 3. The end of concrete located in the center of the structure indicates the height above the protective marking level. The protective marking for this design must accommodate a ball height of at least 4' 8".
 4. The structure size for this wall is 15' X 15'. The protective marking for an overall size area of 15' X 15'. The approximate surface area is 675 sq. ft. as it is required by ASTM F 1487-03 guidelines.
 5. The structure is designed to accommodate 31 children from 2 to 5 years of age.
 6. Separate Children as they play.
 7. To ensure that accurate measurements are obtained from this site plan, print copies on 11 x 17 paper at full scale.
 8. The customer's responsibility is to check local soil conditions and drainage within the site. The site must also be checked by independent utilities prior to excavation.
 9. Completely seal your installation around prior to beginning construction.
 10. The design responsibility is the property of this firm and Playland Inc. and may not be reproduced or used in any manner without the expressed written consent of this firm or Playland.
 11. Developer Signature _____ Date _____

Structure # PS3-90330
