- Notes:**
- This play structure design will meet all Assembly Guidelines for Buildings and Facilities, effective November 22, 2000 as published by the International and Transportation Services Compliance Board with the addition of N/A ground level play components of N/A different types of play and when installed over assemble surfacing.
 - This site plan should be checked against the actual site area prior to the purchase or installation of equipment.
 - The end of measure located in the center of the platform indicates the height above the protective surfacing level. The protective surfacing for this design must accommodate a full height of at least 6 ft.
 - The structure size for this unit is 11' X 21' requiring protective surfacing for an overall size of 23' X 33'. The approximate surface area is 625 sq. ft., as required by ASTM F 1497-04 guidelines.
 - The structure is designed to accommodate 21 children from 5 to 12 years of age.
 - Supervise Children on Day play.
 - To insure that accurate measurements are obtained from this site plan, print copies on 11 x 17 paper at full scale.
 - The customer's responsibility is to check local soil conditions and drainage within the site. The site must also be surveyed for underground utilities prior to construction.
 - Completely read your installation manual prior to beginning construction.
 - This design specification is the property of this firm and Playland Inc. and may not be reproduced or used in any manner without the expressed written consent of this firm and Playland.
 - Perimeter Requires 27 ... Load Space Requires 4 long.
